Prices.—The general index number for June was slightly lower than that of May, and about 3 per cent. lower than for the corresponding month of last year. The index number for pastoral produce was 1,151, for metals 1,184, and for all articles 1,160. During the month, the prices of butter, flour, sheep skins, copper, and silver advanced; but wheat, greasy wool, tallow, lead, tin, and coal exhibited a downward tendency; other articles remained at about the same level as those ruling in May.

Meteorology.—During June, although two definite rainstorms passed over the State, the falls recorded were, with the exception of a small area in Eastern Riverina, the central portion of the south-western slope, and in the southern and central tableland, on the whole, much below the average. The weather conditions prevailing were similar to those ruling throughout New South Wales in April last, although the shortages generally were not quite so large. An area, in all about one-fourth of the State, comprising practically all the northern border districts, and a large portion of the coast, including the metropolitan division, had falls of less than 25 points.

The temperature was generally low, some severe cold periods being experienced with frosts.

Land Selections.—During June 107 new settlers applied for 50,128 acres ; and 46,811 acres, representing 41 blocks, were set apart for residential settlement. Since the beginning of the year, the number of new settlers has been 676, and the area applied for 461,880 acres. The original area set apart for residential settlement since the 1st January has been 293,558 acres, representing 371 blocks.

Vital Statistics—Sydney and Suburbs—June, 1911.—The Births registered numbered 1,393, equal to 26·52 per 1,000 of population ; of the total, 739 were males and 654 females. The rate is very satisfactory, being the highest for the month of June since the year 1895.

The total Deaths numbered 652, namely, 344 males and 308 females, equal to a rate of 12·36 per 1,000 of population, being the highest for the month of June since 1904, and about 2·5 per cent. above the average mortality rate for the previous five years.

The Infantile mortality was 73 per 1,000 births, and was 9 per cent. below the average for the last decennium.

Rural Occupations—Season 1910-11.—Particulars of the number of persons employed in the farming, dairying, and pastoral industries of the State during the past season are shown in Table No. 57, wherein it will be noted that a total of 150,803 persons, comprising 126,171 males and 24,632 females, were so engaged. The figures disclose an increase of 2,402 males and 2,059 females compared with those of the previous year.
